Notes:

Attenuation (typical) at any Frequency = $k_1 \times \text{SqRt}(\text{Fmhz}) + k_2(\text{Fmhz})$

BC shielded cables used up to 1 GHz maximum due to braid oxidation over time.

TC shielded cables used up to 1 GHz maximum due to high loss of Tin Plating.

SPC shielded cables may be used up to their Cutoff Frequency.

Maximum Frequency listed in Table is as specified by MIL-C-17.

Cutoff frequency may be higher than M17 max frequency.

Power Data Given for 50 ohm Cables Only.

Power Data for SPC/PTFE based on +250C center conductor.

Power Data for PE dielectrics based on +80C center conductor.

Power Data for foam PE dielectrics based on +100C center conductor.

DC resistance of outer conductor includes all shield layers in parallel.

Consult Factory for not listed.
